Group Photograph

10.45Break

Meeting up with Project Scientists and Facilitators

Packed Lunch from 12.00 and depart to Projects-

WHOLE WORKSHOP PRESENTATIONS/DISCUSSIONS (morning of Thursday 25 July)

Programme

- Miss Heather Jameson, completing her studies on the aerodynamics of jet engines as a graduate student in the Whittle Laboratory, Cambridge University Engineering Department, gave an inspirational talk about her own career path and about her research in the Whittle Laboratory and its practical importance.
- Sir Martin Rees OM, FRS, Lord Rees of Ludlow, cosmologist and astrophysicist, Astronomer Royal and former Master of Trinity College and former President of the Royal Society, welcomed students to Cambridge and spoke on future developments in space science.
- Teams of students from each of the Tohoku Schools present gave presentations on the current situation in their cities following the 2011 earthquake and tsunami. They spoke about environmental issues, the great reconstruction that has been achieved and the misinformation which still hinders development.
